# RECRUIT

*Your dream team starts here.*

As a broker, your ultimate goal is to improve your brokerage's profitability, and recruiting agents is a great way to do that—but it's not always the easiest task. You only have so much time, and how do you know which agents to focus your efforts on?

Rather than competing for top producers, or casting a wide net and hoping for the best, let the data help you do the recruiting.

## FIND TALENT

*that matches your brokerage.*

Meet Recruit, the AI and machine-learning tool that will help you make recruiting woes history. It intelligently locates and curates the agents who best fit your brokerage, using information about your favorite agents to find similar agents and ranking them in order of best fit using its proprietary Fit Score—so you can find the right talent quickly.

## SAY GOODBYE

*to invisible recruiting.*

Recruit centralizes all your brokerage's recruiting efforts, so nothing is ever a mystery. Simple task lists make it clear what's next, and give you full visibility into every stage of the recruiting process. Plus, centralized agent information means it's easy to reach out—no tracking down phone numbers or email addresses.

## REACH YOUR GOALS

*for growth.*

Spending less time on guesswork tactics for recruiting means you can invest more time into the agents who will have the biggest impact on your brokerage's bottom line—and help you meet your goals for quality growth faster.
